

# JEFF WOLFRAM

*"My love of the built environment and creating two dimensional images of space provides an endless enthusiasm to travel the extra mile in creating dynamically energetic compositions. Dedicated to seeing light interact within space to produce images that show the design's depth. My years of education and experience along with my continued appetite to refine my knowledge of aesthetics and design I strive to create art that states my love of architecture. I welcome you to visit my website [www.JeffWolfram.com](http://www.JeffWolfram.com) to see more of my work."*
