

KAY CHERNUSH

"My aim is to transform, to suggest, to uncover. I want to discover what lies beneath the "reality" before my eyes. I am interested in ambiguity and mystery, in essences and not literal truth, in the tension between reality and artifice. Does this shadow lie on the surface or in the depth? Are those clouds in the sky or a reflection in water? What happens to a particular color when the light falls away? What happens when this shape is juxtaposed with that? These questions stimulate the imagination. Accident and serendipity also play their part, freeing me to see my subjects with new eyes."
