ACRYLIC FACE MOUNT

Acrylic Face Mount, also known as Diasec prints, adheres a photograph to acrylic glass to produce a high gloss finish that achieves a sharper image with more brilliant colors than a standard glass framed print. Also, the print is protected from harmful rays due to the UV (ultraviolet) light resistant properties of acrylic glass. These beautiful mounted prints are perfect showpieces for an art gallery or your home.

* Please call or visit us for pricing.

BOX MOUNT

Box Mounts are a stylish way to show off your favorite images, whether it's a photograph, newspaper or magazine article, print of a map or illustration. Mounted to a firm board with a black frame applied to the back to form the sides of the box they are durable, with a laminate to protect the print, and eliminate the frustrations of reflections that occur in glass framed photographs. Excellent for homes and offices, box mounts are a more cost-effective solution to custom framing.
